5 REASONS

Why you need Medlink's
MIRAssist Service Program
to protect your business

- 1 HIPAA compliance
- 2 System protection
- 3 Business continuity
- 4 Automatic & Managed Recovery
- 5 Low cost

Why is Medlink's MIRAssist™ Service Program essential to protect your business

Here Are Five Reasons:

1. HIPAA Compliance

MIRAssist ensures that the required physical, network, and process security measures are in place and followed to protect PHI.

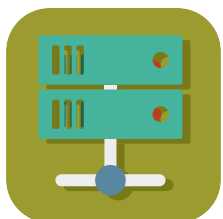

2. System Protection

MIRAssist covers more than just patient data. Your system is fully protected.

3. Business Continuity

With MIRAssist, your business can be up and running quickly after an outage.

4. Automatic & Managed Recovery

MIRAssist protects your patient data, and systems are always monitored for worry-free recovery.

5. Low Cost

Your renewals can be as low as \$84 per month. Local backup storage is included.

Here's How It Works:

Included with your purchase of Medlink Digital Solutions is a one-year data recovery service. This special offer guarantees that your business and patient data are protected. Throughout the year, you will receive regular reports on your data, and access to the MIRAssist remote support team is included in the service.

The MIRAssist remote support team will configure your system protection and monitor it in real time to ensure everything is functioning properly. In the event of any problems, a member of the team will act quickly to fix any issues.

With MIRAssist, you are protected.

MIRAssist™ is a True Data Recovery Solution. We can also provide it separately to be applied to any product such as EMR, PACS, Finance and Operations.

“After being infected with a ransomware virus, all of our patient data was encrypted and unrecoverable. If it wasn't for MIRAssist Recovery Service we would have lost EVERYTHING.”

Chris Naum
CEO of Orthopedic Surgery Associates
