HAND SANITIZER
with 75% Alcohol

Medlink Imaging has now made available a 75% alcohol based hand sanitizer made with a formula recommended by both the World Health Organization (WHO) and the FDA. It contains no gels or scenting agents to inhibit its effectiveness. The sanitizer has a distinct alcohol odor which disappears in 10-15 seconds as the product evaporates, leaving behind no lingering smell. It also contains a small amount of glycerin which acts as a moisturizer to keep from drying the skin.

The ½ Gallon bottles:

- Is suitable for use with a simple hand pump.
- Can be used to refill existing counter and wall dispensers.
- Weighs less than 4lbs full.
- Bottle design is stable enough to use directly on counter top with a hand pump.
- Each bottle has a tamper proof heat seal to ensure its integrity.

The choice is yours

Medlink's Hand Sanitizer **is available both with and without hand pumps** for maximum flexibility. Our **No Touch** dispensers run on batteries and can be placed virtually anywhere. The No Touch operation ensures maximum user protection.
